Applicant Qualifications

For your organization, in the last complete fiscal year:

4638 cats and 1510 dogs were admitted.

4401 cats and 1490 dogs were adopted, transferred, or other live outcome.

204 cats and 42 dogs were euthanized.

9373 cats and 1443 dogs were sterilized.

Briefly describe your animal programs:

Stray/lost pet intake	Foster program	Wellness services to understand pet owners	✓ Volunteer program
Owner surrendered animals	Food bank	Cruelty investigation	High volume spay/neuter clinic
lacksquare Lost and found program	Behavior counseling	☐ Enforcement of ordinances	Full service welness clinic
Adoption program	Disaster services		

Give additional background information on your organization's programs as they relate to this application and the qualifications of the personnel who will be in charge of this program. Show that you have the capacity to carry out this program.

Peggy Adams provides a variety of services to the public at affordable rates. Peggy Adams offers pets for adoption, spay/neuter, TNVR services, a neonatal kitten nursery, Peggy's Pantry Food Bank, dog behavior and training classes, lost and found program, foster and volunteer programs, community outreach and special events. With the help of our community's cat advocates, free roaming cats are humanely trapped and brought into Peggy Adams Monday through Friday. These cats are spayed/neutered, vaccinated for rabies and FVRCP, microchipped according to county ordinance, treated for parasites (Revolution), and ear tipped. These cats stay overnight after their surgery, are given a meal, and picked up the next day by their caregiver to be returned to their outdoor home. We perform approximately 400 TNVR surgeries a month. We would like to further expand our capacity for TNVR by holding mega Spay Days with the goal of performing 500 spay/neuter surgeries on community cats in a single day. We have done an event of this size once before, have a second event scheduled for April, and have the ability to continue performing events like this quarterly. On staff, we have 6 veterinarians, 25 veterinary technicians, and 7 administrative support staff within the medical department. We also have multiple volunteer veterinarians and veterinary technicians that attended the event we held before and have said they are excited to volunteer again.

Florida Animal Friend grants are for low-cost and/or no-cost spay/neuter programs; If you currently have such a program, please describe

We provide low cost spay/neuter to the general public for owned pets. We provide a free spay/neuter program for community cats.

Number of animals sterilized in that program in the past year:

Cats: 6422 **Dogs:** 1065

Target Population

In 2015, Peggy Adams Animal Rescue League began providing TNVR for community cats with additional funding from Palm Beach Animal Care and Control. There are now about 3 other organizations in Palm Beach County that provide low numbers of TNVR surgeries for free or for a low fee. However, the need for TNVR services in Palm Beach County still has not been met. We are inundated with requests for more TNVR surgeries and simply do not have the bandwidth to perform more surgeries during our normal weekly schedule. Florida Animal Friend is highly supportive of proposals that are focused on animal populations that are identified as substantial sources of dog or cat overpopulation rather than being diluted over too broad of a geographic area or diverse animal populations. Describe the specific target animal population(s) of the spay/neuter project proposed for this grant:			
overpopulation rather than being diluted over too broad of a geographic area or diverse animal populations. Describe the specific target animal population(s) of the spay/neuter project proposed for this grant:	What kinds of spay/neuter services are currently available in the target area and in what ways are these resources currently insufficient to meet community needs? Since about 2008, Palm Beach Animal Care and Control was the primary organization providing TNVR for community cats. In 2015, Peggy Adams Animal Rescue League began providing TNVR for community cats with additional funding from Palm Beach Animal Care and Control. There are now about 3 other organizations in Palm Beach County that provide low numbers of TNVR surgeries for free or for a low fee. Objectives

What do you hope to accomplish with these funds (objectives should be specific and quantifiable)?

With kitten season on the horizon, we can "beat the heat" by playing a role in reducing the number of potential pregnancies and kittens in Palm Beach County, by performing 500 TNVR surgeries in a single day. We hope to receive funding from various sources to hold up to four of these mega Spay Day events each year to sterilize 2000 extra cats each year, increasing our number of community cats sterilized by 50%.

How does this program increase the number of sterilization surgeries above the existing baseline?

Currently approximately 400 TNVR surgeries are done monthly. In one Spay Day alone, we would be able to complete 500 TNVR surgeries, more than doubling our impact for the month.

Methods

What criteria will you use to determine eligibility for your program?

There is no specific criteria that must be met. We ask that all cats arrive in traps and we will provide traps to those that bring cats in other carriers. All cats that go through our no cost TNVR program are ear tipped.

How will you advertise the program? Explain how the advertising will reach the target audience.

Regarding Spay Days, we plan on paid advertising through outlets such as Facebook, local Radio, newspaper ads, and/or printed handout and postcards. On our website, we will have a call-to-action on our homepage listing the promotions. We will write press releases regarding the events and submit to various media outlets to generate coverage. We also visit our local WPBF 25 News every other week to spotlight an animal up for adoption. At the end of that segment, we have the opportunity to spotlight an event or promotion. The best way to measure our marketing success is to track clients who visit our shelter. For social media advertising, we can track our impressions and reach numbers. Regarding our website, we will be able to track using Google analytics.

How will you address barriers to full use of the program such as transportation, illiteracy, and cultural hurdles?

Understanding our community is key. We have several Spanish speaking staff members available to translate, as well as offering advertisement, all information, and forms in Spanish. We also have a strong volunteer base and vehicles available to assist caregivers with transportation. We work closely with the radio stations to advertise our services in both Spanish and English.

Does this project involve the transportation of animals by someone other than the client? If so, describe the vehicles, methods for confinement, personnel training, liability releases used to assure the safety of the animals and handlers.

We understand that transportation hurdles may exist and that some of our cat advocates may not be able to transport the colonies of 20 to 30 cats they have humanely trapped. To combat this, we have 4 available vans that are insured through our organization. All volunteers are required to complete a liability release and sign a consent for a Motor Vehicle Records check to drive company vehicles. Additionally, all volunteers will undergo training by our staff TNVR team prior to each event. These methods make it easy to coordinate pick and drop off at several central locations around Palm Beach, as well as assure safety for handlers and animals.

Veterinary Services

What arrangements have you made with veterinarians to perform the surgeries?

All surgeries will be performed in house by veterinarians employed by Peggy Adams, relief veterinarians, and volunteer veterinarians.

Are they:

In-House Veterinarian

Outside Clinic

Combination

Participating veterinary practices if surgeries will not be performed in-house:

Fee Range

What is the fee range to be paid for spay and neuter and what is the distribution to be paid by the client vs. the grant program? Keep in mind that Florida Animal Friend grant funds may only be used for costs directly associated with sterilization surgery (including anesthesia and pain control, which is required) and not for other items such as testing, licensing, and capital purchases. However, \$2 per animal of grant funds can be used for rabies vaccination.

	Amount Paid by Client	Amount Paid by Project	Total Amount
Range for Male Cats	\$0.00	\$80.00	\$80.00
Range for Female Cats	\$0.00	\$80.00	\$80.00
Range for Male Dogs	\$0.00	\$0.00	\$0.00
Range for Female Dogs	\$0.00	\$0.00	\$0.00

Please check each item below to indicate additional services offered at the time of surgery, whether the client is required to pay for them, and if so what the fee is. For example, if an examination is required for surgery but is not charged to the client it would be marked: Required

Yes, Fee to client
No

	Required, Optional, or Not Offered	Fee to Client?
Examination	○ Required ○ Optional ● Not Available	● No ○ Yes
Rabies Vaccination if Due	● Required ○ Optional ○ Not Available	● No ○ Yes
Other Vaccination if Due	■ Required ○ Optional ○ Not Available	No ○ Yes
Pain Medication	■ Required ○ Optional ○ Not Available	No ○ Yes
Parasite Medication	● Required ○ Optional ○ Not Available	● No ○ Yes
HW Testing	○ Required ○ Optional ● Not Available	● No ○ Yes
Feline Leuk/FIV	○ Required ○ Optional ● Not Available	● No ○ Yes
County License	○ Required ○ Optional ● Not Available	No ○ Yes
Ear tipping	Required Optional Not Available	No ○ Yes
Microchip	Required Optional Not Available	No ○ Yes
Other	ORequired Optional Not Available	No ○ Yes

None of the anticipated grant funds can be used for <u>any</u> of the above services, except for mandatory pain medication and \$2 per animal for rabies vaccination.

If necessary, please explain the procedures and fees described above:

N/A

Is this a voucher program? No

If so, how will you assure utilization of the program?

For your voucher program, how have you determined the capacity of the veterinarians listed above to handle the projected capacity?

Will you have the ability to report the number of vouchers issued and the number redeemed for spay/neuter surgeries?

Community Collaboration

Florida Animal Friend values community/inter-agency collaboration. Are there any local groups (such as rescue groups, animal control agencies, TNR groups, local businesses, local media, social service agencies, etc.) other than your organization and your cooperating veterinarians who are committed to assist?

Please list them and detail their level of involvement with the proposed effort.

Name	Level of Involvement
Multiple, regular community cat trappers	Will bring community cats needing sterilization surgery
Operation Catnip	Veterinarian, veterinary students, veterinary technicians committed to attending and participating in Spay Day events
Peggy Adams	Veterinarians and Veterinary Support Staff committed to attending and participating in Spay Day events
VEG Boynton Beach	Veterinarians and veterinary technicians committed to attending and participating in Spay Day events

Other Information

Provide any additional information that will help the grant selection committee understand how the program will operate to achieve its goals. Please see attached Spay Day Logistics document.

Budget

Total number of sterilization surgeries projected:

Cats: 806 **Dogs:** 0

Total budget requested (Budget should not exceed \$25,000): \$25,000.00

Average cost/surgery projected: \$31.00

Describe any expenses that are not included in the grant and how they will be paid for (for example, vaccines, microchipping, ear notching, etc.):

1. Microchipping - \$4.08/cat, required by county ordinance for all cats 2. Flea/tick prevention - \$10.71/cat 3. FVRCP vaccine - \$1.81/cat 4. Salaries – most staff will be paid overtime as this event is on a Saturday. Some staff like veterinarians, will take a different day off the week of the event. 5. Per diem rates – Some of the HQHVSN veterinarians and experience medical support staff will receive stipends. 6. Administrative supplies - \$200/event All above expenses will be paid for via fundraising that raises support for our general fund.

Describe any other funding sources for this program, i.e. other grants, targeted fundraising efforts, budget allocation, etc.

We receive funding from our local Palm Beach Animal Care and Control for sterilization of 4000 cats per year. We will meet or exceed this number for the year so cannot use that funding for this event. We have asked for funding from specific local donors that feel strongly about community cat programs.

What percent of the total cost of the program would this projected grant cover? 50%

Timeline

All projects must be completed within 12 months of receipt of funding, with the final report submitted no later than September 1 of the following year.

Projected start date: 07/01/23/ Projected end date: 07/01/24

Unexpended funds

Any unexpended funds must be refunded to Florida Animal Friend within 30 days of the end of the project.

Requests for extensions

Requests for time extensions are discouraged and not often granted. If it is imperative to request an extension, such request must be made in writing at least 30 days prior to the end of the project. It is FAF's policy to seldom grant more than a 30-60 day extension.

Failure to submit reports and requests within the required time period will impact your agency's future grant applications.

Future Funding to Sustain Public Spay/Neuter

*Explain how the organization plans to fund this program in the future. Having sustainable plans including other grants, local donations and other services generating revenue enhances the chances of receiving this grant.

Future funding for this program will come from a variety of sources. Our local Palm Beach Animal Care and Control will provide funding for sterilization of up to 4000 cats per year. Annual solicitations in our print newsletters and digital campaigns during kitten season will provide funding from individual donors. Matching campaigns from the Batchelor Foundation will provide up to \$37,500 in funding. Two local private foundations will award grants to support this program. We will also ask for funding from specific local donors that feel strongly about community cat programs.

Promotion of Florida Animal Friend Spay/Neuter License Plate

*Applicants selected for funding are expected to publicize their grant in support of their spay/neuter program and promote the sale of the Animal Friend license plate via press releases, newsletters, website links, social media, etc. Please describe your plan to promote the Florida Animal Friend Spay/Neuter License Plate. Grantees are required to submit documentation of promotional endeavors with their final report.

We plan to promote the sale of the Animal Friend license plate through outlets such as Facebook, Instagram, e-newsletters, and our website. We will promote it in the packages given to adopters and on the recognition screens in the Adoption Center. Peggy Adams will purchase license plates for all company vehicles, key employees, and for employee incentive raffles. Additionally, all employees will be encouraged to purchase a license plate.

Number of FAF specialty plates on vehicles of staff and/or volunteers: Unknown
